

## ***IST continues to grow in Brazil and expands its team of local experts***

**Sao Paulo, October 30<sup>th</sup>, 2020. - *IST (Investigation Service Technologies)*** Brazil expands the services offered and increases the team of local experts who will be led from now on by engineer Paulo Freitas.

IST started operating in Brazil in 2018 with the specialty of **Fire and Explosion Investigation** and in these two years has been forming a team which already counts with 15 local professionals that provide services in other specialties IST offers in other countries, such as **Machinery Breakdown, Civil Construction** and **Agri-Food Incidents**, among others.

As for the area of **TECHNICAL SURVEYING**, IST has a team of professionals in each and every area of expertise with a long and consistent experience applied in the **Insurance Industry and Legal Technical Assistance**. This team will be led by **Paulo Freitas**, a Civil Engineer with over 17 years of technical experience in the sector and specialized in Insurance and Forensic appraisals, and in programming and implementation of projects, contract management and construction.

## About *IST*

**Investigation Service Technologies - IST-** (formerly *Investigación de Siniestros*, IS), founded in 1995, is the leading company in analysis of losses' and damages' causes in Spain, Portugal and Latin America, specializing in several areas such as: Fires and Explosions, Machinery Breakdown and Product Liability, Claims in Buildings, Civil Construction, IT and Cyber Risks, Work Accidents, Environmental Emergencies and Agri-Food Incidents.

The company has offices in Spain, Portugal, Colombia, Mexico, Brazil, and Chile. It also has a network of local employees in Latin America to meet the demands locally.
